### SHARK RELEASE 101

On Saturday 13th June Sharklab-Malta will be releasing 6 Smaller Spotted Catsharks back to where they belong in the waters around the Maltese Islands. This will take the total number of sharks released to "101".

This is part of the ongoing recovery and release program supported by the Malta National Aquarium.

The fertilised eggs were removed from the "dead" females, landed by fishermen at the main wholesale market in Valletta, taken by members of Sharklab and placed into a controlled environment until after 6 months they hatched. The 6 being released are now 6 months old (post hatch).

We have done all we can to ensure the best possible start to life and as we watch them swim away we will wish them well and hope they can find sanctuary and a place to call home.

The release site will be at South Quay, this is located on the left hand side of Cirkewwa opposite to Paradise Bay. There will be signs en-route..

Please come along and invite your friends to share this special release.

We look forward to seeing you there.
